A sample of clients is listed on the right.
References are available upon request

Identified, recommended, and created digital solutions which satisfied a broad range of professional user needs.

- TakeRoot, which provides leadership consulting for millennials
- Internet Bar Organization & Tech for Justice, non-profit
- The Village Firefly, a local gift store in Rice Village
- Emerge Fellowship & Houston Independent School District

Web Designer: Rice University, Center for Languages & Intercultural Communication
Houston, TX | Fall 2014 - present

- Designed portions of the official .edu website with HTML, CSS, and Javascript within an XHTML content management system
- Managed Wordpress sites for faculty across 12 foreign languages

Media Intern: Carter & Co. Communications
Fresno, CA | Summer 2012

- Aided in execution of promotionals for Andy Vidak's Congressional campaign, McCaffrey real estate, and the Fresno Grizzlies.
- Designed event graphics using Adobe Illustrator and Indesign

awards

AngelHacks Silicon Valley Finalist
Mountain View, CA | Summer 2014

- Advanced to the final round (top ten) & pitched before angel investors
- Designed interface for a real-time Question & Answer platform with an Angular.js + Node.js + MongoDB + Express development stack

NASA Space Health Hackathon Finalist
Houston, TX | Spring 2014

- Won 5th place, winning the opportunity to present ideas to NASA
- Addressed real-world problems that astronauts currently face
- Helped design a proposal which "gamified" the act of lost and found
- Presented the idea on behalf of the team in the final round.

leadership

Thresher Chief Technology Editor
Official campus-wide newspaper, since Spring 2015

- Led redesign of new website, servicing over ~20,000 page views/mo.
- Introduced Google Analytics/Developer Tools to student developers
- Boosted online user engagement by 20% compared to previous year

Rice Apps Design Team Lead
Student web app development group, since Fall 2014

- Founded the "design team", which sought to address a UX/UI gap
- Designed main website & logos for four student web applications
- Taught agile web development principles, HTML, CSS, & Javascript
